PROFESSIONAL SUMMARY

Third-year engineering student bridging hardware development, cloud architecture, and technical sales. Proven track record of designing embedded systems, deploying full-stack platforms, and delivering high-impact customer success. Adept at translating complex technical specifications into actionable client solutions.

CORE COMPETENCIES

- **Hardware & Design:** MCU Programming (e.g., STM32, ESP, Arduino), PCB Design (KiCad, Proteus), Control Theory, Digital Oscilloscopes, AutoCAD, Fusion 360, 3D Printing.
- **Software, Cloud & AI:** Next.js, Supabase, Antigravity IDE, C++, Python, JavaScript, MATLAB, MySQL, Google Tools, Applied AI workflows (DeepSeek, Claude).
- **Professional & Clinical:** Technical Sales (B2B/B2C), Customer Retention, Clinical Equipment Troubleshooting, Bilingual (Arabic/English).

ENGINEERING & DEVELOPMENT PROJECTS

Telemedicine Robotic Arm

Engineered a remote-controlled robotic hand using embedded controllers, custom 3D-printed mechanics, and a web-based HTML interface for real-time manipulation.

Autonomous AI Robot

Developed a self-balancing system utilizing custom PID control and embedded MCU logic. Integrated an AI chip for voice-assisted live web searches and automated tasks.

Smart Infant Incubator

Programmed a C++ logic framework integrated with hardware sensors to actively monitor and stabilize critical microclimate conditions.

Full-Stack E-Commerce Platform

Built a responsive Next.js/Supabase storefront featuring a secure admin dashboard, dynamic database filtering, and an integrated Telegram bot for live chat support.

Additional Projects (See Portfolio)

Global Gender Gap Data Dashboard, IoT Smart Environment App, Pharmacy MySQL Database Architecture, and MATLAB ECG Signal Analysis GUI.

EXPERIENCE & CLINICAL TRAINING

Technical Trainee – ICU, Ventilators & Dental Units

Gained hands-on exposure to the operation, maintenance, and troubleshooting of life-support systems and advanced clinical equipment.

Customer Sales Executive – Vodafone Ireland

Navigated complex B2C sales cycles, negotiated accounts, and resolved critical technical issues to drive customer retention.

Dispatcher – Jet-Black

Managed high-stakes logistics, ensuring precise communication and operational efficiency.

B2C Team Leader – AIESEC

Led outreach campaigns and managed team logistics to promote partnerships.

EDUCATION & CERTIFICATIONS

B.Sc. Biomedical Engineering & Systems | Al Shorouk Academy (Expected 2026)

Certifications: C/C++ (Advanced), Python, MySQL, Arduino, TICO Commercialization, English C1+.
